

VWX-FHD-IP-10 VWX-UHD-IP-10

All in One Solution Videowall Controller and KVM Routing System

What is AV KVM Over IP?

Reliable KVM over IP

VWX with USB support enables remote access to keyboards, mouse and other devices (KVM) that offer flexibility in securing or accessing equipment such as digital media players that may be stored in remote locations. Using the ethernet network, using and controlling your USB devices remotely is just as easy as on your own desk.

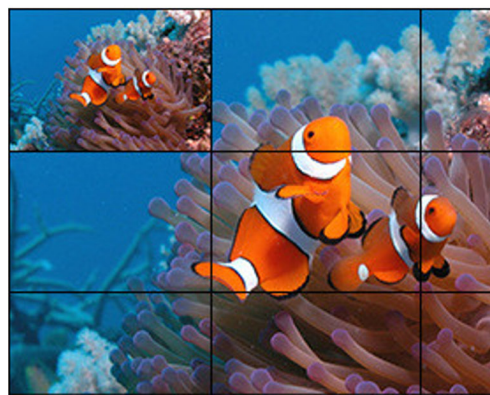

VWX-FHD-IP-10

VWX-UHD-IP-10

Video wall

The distributed integrated management system adopts synchronous splicing technology to easily realize the image-outside-picture tiling mode, picture-in-picture overlay, roaming, cross-screen, zoom

UI customization
